Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 09/556,647	Applicant(s) BAUER, MITCHELL R.	
	Examiner Pierre E. Elisca	Art Unit 3621	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 24 January 2008.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

1. This communication is in response to Applicant's response filed on 01/24/2008.
2. Claims 15-18, 19, 20, 22, 31-38, 40-50 remain pending.

Allowable Subject Matter

3. Claims 15-20, 22, and 31-38 are allowed over the prior art.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 40-49 are rejected under 35 U.S.C. 102 (e) as being anticipated by Salvo et al (U.S. Pat. No. 6,341,271 B1).

Salvo discloses a method of selecting a raw material for manufacturing a pressure sensitive material product therefrom comprising:

Storing in a computer system a list of different raw materials, with each of said raw materials having various customer application criteria stored therewith, and said

criteria being indicative of intended application of said raw material in a product, said customer application criteria comprises print method, adhesive type, minimum temperature for adhesive type, service range of adhesive type, and facestock type, populating a plurality of filter lists corresponding with said stored customer application criteria for said different raw materials, displaying a material browser including a plurality of filters corresponding with said filter lists, selecting one of said filter lists and specifying a filter criterion therein, filtering said list of raw materials to obtain a filtered list thereof matching said filter criterion, and displaying in said browser said filtered list of raw materials matching said filter criterion (see., abstract, col 1-col 7).

6. Claims 40-49 are rejected under 35 U.S.C. 102 (e) as being anticipated by Purcell (U.S. Pat. No. 5,940,807).

Salvo discloses a method of selecting a raw material for manufacturing a pressure sensitive material product therefrom comprising:

Storing in a computer system a list of different raw materials, with each of said raw materials having various customer application criteria stored therewith, and said criteria being indicative of intended application of said raw material in a product, said customer application criteria comprises print method, adhesive type, minimum temperature for adhesive type, service range of adhesive type, and facestock type, populating a plurality of filter lists corresponding with said stored customer application criteria for said different raw materials, displaying a material browser including a plurality of filters corresponding with said filter lists, selecting one of said filter lists and specifying

a filter criterion therein, filtering said list of raw materials to obtain a filtered list thereof matching said filter criterion, and displaying in said browser said filtered list of raw materials matching said filter criterion (see., abstract, col 1-col 10).

Claim Objections

7. Claim 50 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

RESPONSE TO ARGUMENTS

8. Applicant's arguments with respect to claims 40-49 have been fully considered but they are not persuasive.

REMARKS

9. In regard to Applicant's arguments filed on 01/24/2008, Applicant argues that neither Salvo nor Purcell recites "adhesive, or glue or minimum temperature". However, the Examiner disagrees with this assertion since Salvo discloses an indicator 108 that comprises a level sensor, a weight indicator, a volume analyzer, and other devices that permit determination of the amount of inventory in a receptacle. Further the indicator 108 may also measure amount influencing variables, such as humidity, temperature. Please note that must printing machine have a plurality of variables or

futures such as adhesive or glue. Therefore, it is inherent to realize that the controller 108 of Salvo is capable of monitoring minimum temperature, adhesive or glue.

Conclusion

10. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
